# CONNECTED LIVING

LIFE CAN BE THIS SIMPLE

## HOUSES AS INDIVIDUAL AS THEIR RESIDENTS ARE

Today, digitalisation and networking are an essential part of our daily lives, making them easier, more convenient and safer. Smartphones are always on and voice control and personalised automation of many everyday routines are already changing the way we live, work and travel. Legrand solutions for connected living using these technologies allow to easily adapt residential buildings and also offices, hotels and other commercial buildings exactly to their users' needs. They always aim to gain maximum benefit from the opportunities offered by technology, while at the same time ensuring ease of use. And as personalisation is a key requirement of today's customers, Legrand solutions not only provide flexibility and functionality in terms of technology, but also designs that allow customers to fully express their individuality in terms of design.

Thanks to the Internet of Things, users can always stay connected with their homes wherever they are. They can decide how they want to control specific functions from any location. They can define and call up scenarios, which can be pre-programmed to run depending on a specific time, mood or a variety of individual requirements. Technology also opens up new ways to save energy.

The smart home offers many opportunities and Arteor with Netatmo is part of it. With Legrand it's really easy to fully benefit from this new potential.

# SIMPLE PLANNING, MAJOR BENEFITS

ARTEOR™ WITH Netatmo

Zigbee/ Wi-Fi gateway

Home/Away wireless master switch

Connected socket outlet

## THE SMART RADIO SOLUTION

Arteor with Netatmo is a radio based solution for the connected home. The intelligent products communicate with one another via radio Zigbee (2.4 GHz waveband). This means there is no need for specific or extensive cabling. Also, although the range only contains a few products, these can be used to create lots of individual solutions for a more customised feel at home.

## SIMPLE, ADAPTABLE, OPEN

Arteor with Netatmo has been designed and developed as a simple solution to make every house more individual, convenient and secure. Simple for planners, who are able to integrate many useful functions without having to provide for complicated cabling. Simple for installers, who are able to install the system without a great deal of effort or specialist knowledge. Simple for users, who will find it convenient to operate, easy to extend and are able to make changes at any time.

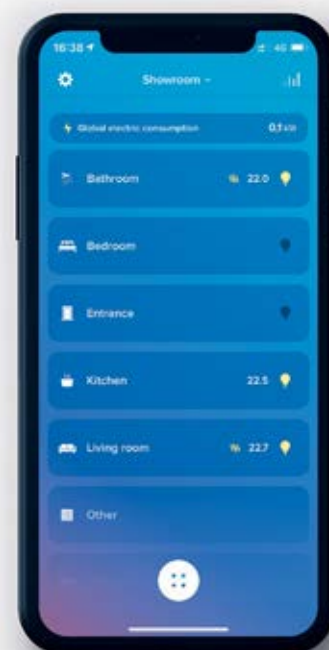

## APP CONTROL FOR EASE OF USE

All functions in an Arteor with Netatmo installation can also comfortably be controlled on your smartphone or tablet: switching individual lights on or off, controlling roller blinds, curtains and electrical appliances or triggering more complex scenarios - using the app, you have everything under control. And you stay connected with your home, no matter where you are.

## VOICE CONTROL

Using voice commands, the installation can be managed without lifting a finger.

# LIFE MEANS CONSTANT CHANGE

ARTEOR™ WITH NETATMO  
IS OPEN TO ANYTHING

Whatever changes life brings, the connected home easily adapts to these – thanks to Arteor with Netatmo. Radio technology with wired and battery-operated wireless controls makes the whole installation flexible. The wiring does not have to be changed to integrate new functions or move a switch to a different location.

Whether during installation or changes at a later stage everything can be completed quickly, simply and cost-effectively.

Every day use, of course, stays as simple and intuitive as ever.

## YOUR CUSTOMERS APPRECIATE FLEXIBILITY

Arteor with Netatmo helps you convince even sceptical customers of the benefits of a smart home: It doesn't take much time or effort to install, and subsequent changes are not a problem. Repositioning switches as the kids grow up, choosing a new combination of switches and sockets if the home office has to be converted into a child's bedroom, adding new functions whenever domestic circumstances change – their smart home can easily be adapted to new chapters in life, changed priorities regarding the use of space or new requirements in terms of safety, comfort and functionality.

# LIGHTING CONTROL

SIMPLY INTELLIGENT

Connected switch without neutral, with dimmer option, wired

Connected switches with neutral, with dimmer option, wired

Wireless light switch

## BRIGHTER AND DARKER INSTEAD OF JUST ON AND OFF

Arteor with Netatmo makes light switches smart. With their integrated dimmer function, you no longer just turn a light on or off, you can now use them to create exactly the lighting mood you want. The switches with dimmer option are available with or without a neutral. They are designed for all modern light sources, including for dimmable LEDs, so that you can set up a flexible lighting system which will also help you save energy. They can be controlled by one or more wireless light switches thereby offering a completely new freedom for planning, renovations included.

Connected switches with neutral, wired

Wireless light switches

## A JOY TO USE

Arteor with Netatmo switches with dimmer option have a handy memory level function, so the light comes back on again at the same level of brightness as when it was switched off. For ultimate convenience just use the Home + Control App to create any mood you want using your smartphone.

Micromodule switch -  
to connect lights  
with a ceiling box  
installation

The lighting micro-module is installed in the ceiling box near the light. This makes it possible to transform a conventionally-installed light into a convenient connected light, without any need for expensive rewiring.

Wireless flush-mounting switch

The wireless switch, which can be installed in the flush-mounting box very easily expands the options of a wired lighting system, without compromising on aesthetics.

# NETWORKED LIGHT

EASY TO INSTALL

Wireless light switch

## CORRIDOR LIGHTING MANAGEMENT MADE EASY

Compatible with the Arteor with Netatmo gateway, the CX<sup>3</sup> with Netatmo connected latching relay is installed in the electrical cabinet. It's a smart choice that makes the control of lights in corridors and staircases really easy. The connected latching relay can be controlled by either mechanical push-buttons by wiring or wireless light switches, which are then paired with the latching relay. In either case, you can control your lighting via the Home + Control App or by voice. Whether by individual control, integration into scenarios, or preprogrammed daily or weekly routines that are easy to set up – the choice is yours. Energy consumption can also be viewed on the app, contributing to targeted energy savings.

# ROLLER BLIND CONTROL

SIMPLY CONVENIENT

Connected curtain/roller blind switches

Curtain/roller blind wireless switch

The regular raising and lowering of roller blinds is made much more convenient by Arteor with Netatmo. In addition, the connected curtain/roller blind switches offer a stop function and level management.

And a single wireless control can manage up to 20 wired roller blind switches, so that a touch of a button operates whole groups of roller blinds, in centralised mode or as part of pre-programmed scenarios. Opt for even more convenience by choosing to control the system using the Home + Control App or voice control.

Flush-mounting wireless curtain/roller blind switch - a handy function that discreetly blends in.

# SCENARIO SWITCHES

MORE OPTIONS FOR A MORE PERSONAL TOUCH

Home/Away wireless master switch -  
Pressing one button is enough

Wake Up/Sleep wireless switch -  
Good night and good morning

For everyday situations that recur regularly, pre-programmed scenarios provide genuinely enhanced convenience. Special scenario switches come with preconfigured scenarios, which can easily be personalised in the Home + Control App to suit your individual needs. “Home”/“Away” and “Wake Up”/“Sleep” scenarios control the lights and shutters just as the user wishes. For example, when they get home, all they need to do is press the switch by the door to open the shutters and turn on the lights. Similarly, when leaving the house, one push of a button is enough to have all of the shutters come down and turn off all lights. No more electricity gets wasted because someone forgot to turn off a light.

## FOUR CUSTOMISABLE SCENARIOS

The Arteor with Netamo 4 scenes wireless switch allows four individual scenes to be programmed as you wish. The app can be used to assign them any name you like, and also specific icons. With configuration made that easy, no need to worry about changing the scenes at a later stage.

Let the guests in

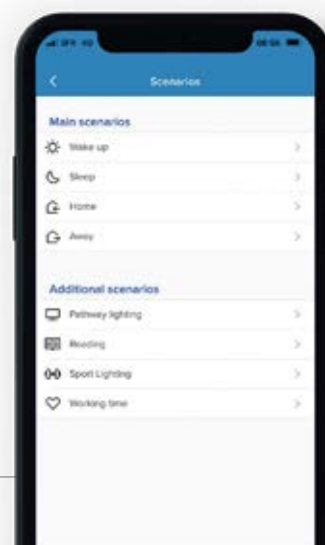

Creating the atmosphere you want is child's play

Everything you need for a pleasant evening

The best prospects for maximum convenience

# CONNECTED SOCKET OUTLETS

REMOTE CONTROL  
MADE EASY

Connected British standard 13 A  
switched socket outlet, 2-gang

Connected British standard 13 A  
switched socket outlet, 1-gang

## MORE FREEDOM IN PLANNING AND IN USE

Arteor with Netatmo turns socket outlets into smart components of the connected home. This allows any type of electrical appliance to be switched on and off remotely or integrated into individual scenarios. Connected socket outlets are controlled using switches that can be positioned freely on the wall, using the Home + Control App or voice assistants. In addition, the connected sockets provide useful information about weekly and monthly energy consumption and will send an error message to a smartphone in the event of any problem, so that you can quickly take the appropriate action.

Learn more:  
Smart electrical panel brochure

## A POWERFUL SOLUTION FOR LOADS UP TO 20 A

Using the CX<sup>3</sup> with Netatmo connected contactor in combination with the Arteor with Netatmo gateway, even high power consuming devices can be operated safely from a distance and integrated into the smart home installation. Whether they wish to control air conditioning, pool pumps or electrical vehicle charging stations, your customers can rely on the convenience of remote control and pre-programmed processes. And what's more: energy consumption can be monitored on the app. An efficient contribution to energy saving.

CX<sup>3</sup> with Netatmo  
Connected contactor  
For specific circuits  
up to 20 A.

# FEW COMPONENTS

LOTS OF OPTIONS

The system consists of only a few simple components. The 'Gateway Kit' that needs to be installed to start, connected controls which trigger actions, such as controlling lights, roller blinds and electrical appliances and wireless, battery powered controls. They manage scenarios, create centralised functions and allow remote control of individual functions

## CONNECTED WIRED PRODUCTS

The wired products are installed in the same way as conventional components and then paired with the wireless switches (which can be positioned anywhere) via the Zigbee 2.4 Ghz waveband. Thanks to the dynamic mesh network, all functions can easily be reconfigured at any time. It is also easy to add extra modules.

**START**

The diagram illustrates the system components and their connection. On the left, a 'Gateway kit' (a square wall plate with a central diamond-shaped sensor) is shown connected via a curved line to a 'Wireless device (battery powered)' (a square wall plate with two buttons). On the right, a smartphone displays the 'HOME + CONTROL App' interface, which shows a list of rooms with their respective energy consumption and temperature readings. A Wi-Fi symbol is positioned above the smartphone, indicating its connection to the system.

**Gateway kit**

**Wireless device (battery powered)**

To start the connected installation with Arteor with Netatmo, the Gateway kit is essential. It's used to create the radio network and the Wi-Fi connection of the connected installation and consists of a Zigbee/Wi-Fi gateway and a Home/Away wireless master switch.

The Home + Control App, which can be used to control the system via smartphone and tablet, is available for devices with Android and iOS. Download it for free from your usual app stores.

## WIRELESS CONTROLS

Wireless light and roller blind switches are used to extend the installation and enable individual, group-based or centralized remote control of lighting and roller blinds. They are adaptable to take into account evolutions of the installation over time. Wireless scenario controls are used to activate pre-programmed, more complex scenarios that enhance comfort when you wake up in the morning or go to bed at night, leave the house or come home. Additionally, the new 4 scenes wireless switch allows four individual scenes to be programmed as you wish.

# A SMART SYSTEM

FEW COMPONENTS,  
EASY TO CONFIGURE

Many useful functions can be implemented at home using just a few different devices. To start the connected installation with Arteor with Netatmo, the Gateway kit consisting of the gateway and master switch is essential.

## GATEWAY

Connects the Arteor with Netatmo system to the home Wi-Fi network. The gateway is necessary in order to use the Home + Control App and thereby enables convenient control of the installation via smartphone, tablet or via voice control.

## WIRELESS MASTER SWITCH

Used to create the Zigbee radio network (2.4 GHz waveband) via which all components within the system communicate with each other. No need for complicated cabling. The Home / Away wireless master switch also allows to launch the preset life scenes "Leave Home" and "Back Home".

Few components are required to enable control of lighting and shutters, more complex scenarios and electrical appliances via switched outlets. The system's modular structure allows for easy adaptation to changing needs and enables extensions any time they are required.

The LED in the switch serves as a locator while also signalling the product's status. During pairing, its changing colours guide you through the process.

## THE CONNECTED SWITCH - 4 IN 1

This compact, smart and versatile product combines 4 functions in one: both a switch and a dimmer, it also has indicator and locator features. All this in a device just 34 mm deep, fitting any standard mounting box.

# EASY INSTALLATION

WHETHER NEW OR RENOVATION

## 5 STEPS TO A CONNECTED HOME

1

After installing all wired devices, switch on power and all LEDs will light up in red.

2

Press the master switch at its center for 5 seconds.

3

The LEDs now light up in green, showing that your network has been created.

Arteor with Netatmo is a radio solution, requiring no extra wiring as it uses the existing infrastructure. This makes it the ideal choice for upgrading an existing installation into a connected home. But for new building projects, too, it offers definite advantages, as its simple installation cuts effort to a minimum.

To pair them, press on the wireless switch you wish to pair, while tapping it three times onto the wired devices you wish to control. The LED's blue light tells you that the pairing was successful.

After a short press on the master switch, all the LEDs turn off.

# SMARTHOME VIA SMARTPHONE

ADD A TOUCH  
OF SMARTNESS

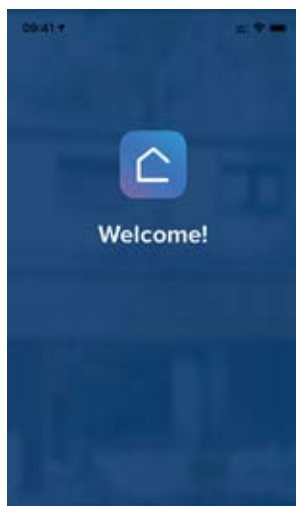

The Home + Control App changes everything not only in terms of control of the smart home but also in terms of its configuration. The installer can use the app to conveniently configure the entire system, based on the individual specifications of their customer: the function assigned to each of the components, the way they interact, the scenarios users are able to trigger - all of this can be determined using the highly intuitive app. Moreover, much of this can be input in advance, once the user's wishes have been clarified at the consultation stage. This makes life easier for installers, improves their efficiency and ensures their work is more highly valued.

Home + Control  
LEGRAND

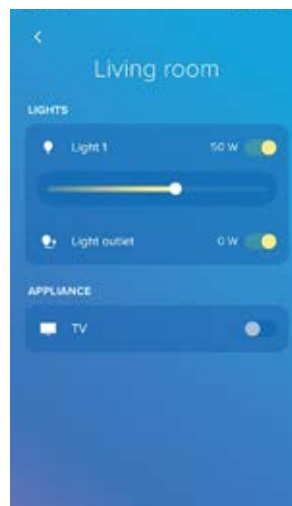

The app used by the installer for configuration purposes is also used to control the entire system. The remote control options it provides are particularly useful. The app displays alarm messages if, for instance, the refrigerator is no longer powered or a light remains on when noone is supposed to be at home. This means the user can react accordingly and act from a distance to prevent any greater damage.

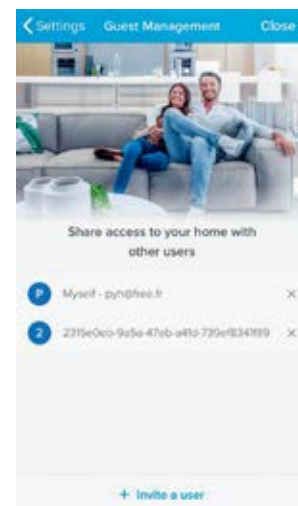

Configuration is based on a set of simple steps.

Each room is configured individually.

All functions can be set individually.

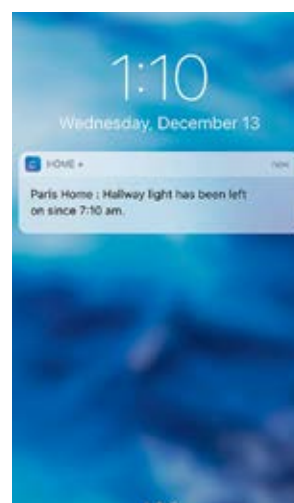

Invite each member of your family.

Energy consumption can be queried for individual devices.

Enables fast responses to faults

Alarm messages reach the user wherever they may be.

# VOICE CONTROL

YOUR HOUSE OBEYS  
YOUR EVERY WORD

How can your customers control all of the functions of their smart home electrical installation? Just the way they want: With wired or radio-controlled switches on the wall, fully automatically via pre-programmed sequences, from anywhere by using the app, or simply by using voice control. Arteor with Netatmo makes residents free to choose.

Connected wired and wireless controls for local and remote control

## EASY TO USE ANY WAY YOU LIKE

The system works smoothly with the most widely used voice assistants: Google Assistant, Amazon Alexa and Apple Siri. Just say the word and the house does what it's told. Voice control enables you to switch the lights on or off, run scenarios or set the desired temperature. Digital assistants are definitely making our lives easier.

# ENDLESS POSSIBILITIES, ONE LOOK

CONSISTENT DESIGN

Connected light switch

Connected curtain / roller blind switches

No matter which of the many potential functions your customers choose, the whole installation can be implemented using a consistent design, because Arteor with Netatmo fits seamlessly into the Arteor range of wiring devices. This homogenous look can of course also be achieved when upgrading an existing Arteor standard installation into a connected installation using Arteor with Netatmo components. Arteor with Netatmo allows you to satisfy your customers' every wish for more convenience and safety while meeting the highest standards in aesthetic terms. Because the connected control devices for lighting and roller blinds, wireless controls and even the connected socket outlets are all part of the same design line.

Fully integrated design -  
blends seamlessly into the overall installation

SMART WAY TO CONTROL  
HOME TEMPERATURE

## Smarter AC <sup>WITH</sup> Netatmo

CONNECTED THERMOSTAT FOR HVAC SYSTEMS  
WITH AIR CONDITIONING UNITS AND FAN COIL

Control and manage your home temperature in a smart way wherever you are, thanks to the integrated wi-fi connectivity, to the Home + Control App and the compatibility with voice assistants. Available in black, white and sand.

# OPEN AND INTEROPERABLE

GREATER FLEXIBILITY FOR CUSTOMIZATION

Find out more about WORKS WITH LEGRAND:  
<https://developer.legrand.com/>

## OPEN FOR SHARED SOLUTIONS

Arteor with Netatmo is Wi-Fi enabled and uses the radio protocol Zigbee, meaning third-party solutions can be integrated seamlessly. This interoperability makes it even easier to network your home with optimal flexibility and efficiency.

Legrand extends an open invitation to start-ups, independent developers and leading companies to develop and implement joint solutions for maximum user benefit. This is the purpose of the “Works with Legrand” program, which was created to facilitate and encourage cooperation. A dedicated portal gives third-party providers access to the open APIs used in Legrand’s IoT solutions, enabling them to incorporate the Legrand connected offerings into their own systems and services. A way of enabling the development of ever more efficient and seamlessly connected smart solutions for the places where we live and work.

## BE YOUR OWN PROGRAMMER

All the devices of the Arteor with Netatmo range are now certified Zigbee 3.0. What's more, Arteor with Netatmo is also certified Zigbee Green Power and compatible with the Zigbee Over the Air (OTA) update process.

This allows system integrators to integrate Arteor with Netatmo directly into their solutions through their own gateways and to manage our devices directly through their apps. For easy realization of tailor-made solutions that perfectly respond to their customers' needs.

All the relevant development resources are accessible on the web portal Works with Legrand.
